

Average PV energy storage price per 10kWh in Vietnam

How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

How much solar power does Vietnam have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024. Last year's new additions totaled around 79 MW. This content is protected by copyright and may not be reused.

How much does electricity cost in Vietnam?

In 2022, the average electricity retail price in Vietnam was at 8.3 U.S. cents per kilowatt hour. The average retail price for electricity in the country has been growing steadily in the country in recent years. Get notified via email when this statistic is updated.

What are the requirements for a battery project in Vietnam?

The Vietnamese authorities also decided that battery projects under the FiT scheme must have at least 10% of a PV plant's capacity and offer at least 2 hours of storage. According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024.

Does Vietnam need a 2025 Solar Plan?

Notably, the 2025 plan mandates that concentrated solar must include storage (minimum 10 percent of capacity, 2-hour duration), a requirement absent in the 2023 version. Vietnam's solar panel trade is regulated under Decree 26/2023/ND-CP, which outlines the Schedule of Export Tariffs and Preferential Import Tariffs.

How has the FIT program impacted solar power development in Vietnam?

The FiT program has been a major driver of solar power development in Vietnam, offering a tariff of 9.35 cents per kilowatt-hour (kWh) for projects completed by June 2019. This program led to a surge in solar capacity, reaching 4.46 gigawatts of new installations.

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop cost benchmarks to measure progress towards goals and guide research and development ...

The PV industry typically refers to PV CAPEX in units of \$/kW DC based on the aggregated module capacity. The electric utility industry typically refers to PV CAPEX in units of \$/kW AC based on the aggregated

Average PV energy storage price per 10kWh in Vietnam

inverter capacity; ...

Between 2010 and 2024, the average installed cost of photovoltaics worldwide declined steadily due to the widespread availability of materials, which reduced production expenses.

The storage system must have a minimum capacity equal to 10 per cent of the solar plant's capacity, a storage/discharge duration of two hours, and at least 5 per cent of total electricity output must be from stored power.

Electricity prices in Vietnam In May 2025, and Vietnam's average electricity price per kWh was set at VND 2,204.07 or about US \$0.084, excluding value-added tax (VAT), per Decision 599/QD-EVN.

The updated framework provides region- and technology-specific tariff ceilings for both ground-mounted and floating solar installations, with and without battery storage ...

Estimating the total cost of energy storage connected to a rooftop PV installation is a complex affair, involving factors such as tax, the policy environment, system lifetimes, and even the weather.

While the demand for 10kWh energy storage continues to grow, there are notable challenges that need to be addressed. The initial investment remains a barrier for many potential users who ...

To achieve this goal, a transition to green and clean energy is essential. According to World Wildlife Fund Vietnam (WWF-Vietnam), Vietnam's solar energy is evaluated as having high development potential renewable ...

According to the average price of 1,000 dollars per kWh of storage capacity mentioned above, the storage unit costs 5,000 dollars. The price for the plant thus increases to a total of 12,750 ...

The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year, a similar fall to that seen in 2023, as reported by Energy-Storage.news, when CEA launched ...

At the heart of this green revolution lies the potential of photovoltaic (PV) systems, particularly those equipped with storage capabilities to ensure a continuous energy supply. A 10 kWp PV system with storage ...

For ground-mounted solar plants with battery storage systems, the maximum tariff is VND1,571.98/kWh in the North, VND1,257.05/kWh in the Central region, and VND1,149.86/kWh in the South.

Government investment and green energy investment funds such as JETP are strategically directed towards renewable energy sources, including solar, wind, biomass, hydrogen energy, and efficient energy storage ...

Average PV energy storage price per 10kWh in Vietnam

Government investment and green energy investment funds such as JETP are strategically directed towards renewable energy sources, including solar, wind, biomass, ...

The analysis is performed in two systems: the existing PV system (PV-Only), and the PV system with the addition of a BESS (PV-BESS). LCOE and NPV are the indicators to ...
