Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. From ESS News Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

How much does electricity cost in Israel?

Israel, September 2023: The price of electricity for households is ILS 0.617 per kWh or USD 0.166 per kWh. The electricity price for businesses is ILS 0.393 kWh or USD 0.106 per kWh. This includes all components of the electricity bill such as the cost of power, distribution and taxes.

What does IEA's energy auction mean for Israel?

The auction, managed by the Israeli Electricity Authority (IEA), will facilitate the deployment of large-scale energy storage systems designed to integrate more renewable energy into the grid. With total investments estimated at ILS 3 billion (~\$840 million), the projects are expected to commence operations in 2027.

How much does a kW power plant cost?

The tender, which attracted 11 bidders proposing 29 projects, set capacity tariffs ranging from 2.0 to 3.0 agorot per kW, which in USD is approximately \$0.00564 to \$0.00847 per kW. (Note that a conversion is therefore needed to kWh, which is an annual figure. Fully formed, the price is therefore \$49.41 to \$74.20 per kWh.)
