

Average rooftop solar storage price per 10kW in India

How much does a 10 kW solar system cost in India?

In India, a 10 kW solar rooftop system can cost between INR 400,000 and INR 817,000, depending on the type of system and the brand. The government of India offers a subsidy of up to INR 78,000 for systems over 3 kW. Hence, for a 10 kW system, you will get a 20-40% reduction in the cost. Which is the best solar calculator in India?

How much does a rooftop solar system cost in India?

The price to install rooftop solar panels in India ranges widely. It goes from INR 1.5 lakh to INR 5 lakh. For smaller setups, like a 1 kW system, it's between INR 65,000 and INR 85,000. Bigger systems, such as 10 kW, cost INR 4.5 lakh to INR 4.6 lakh before subsidies. What components are included in a rooftop solar panel system?

Is a 10 kW solar rooftop system a good investment?

For homes with high electricity consumption and businesses with relatively fewer electricity needs, a 10 kW solar rooftop system will be a great investment. In this article let's take a look at pricing, energy production and returns of 10 kW solar rooftop systems in India.

How much do solar panels cost in India?

Polycrystalline solar panels, for a small system, cost about INR 32 per watt. For a large system, the price drops to INR 25 per watt. Monocrystalline and bifacial panels have similar prices, making solar affordable for everyone. Using a solar panel calculator helps estimate your solar power system cost.

How a home rooftop solar system works in India?

Home rooftop solar panel installation in India is surging rapidly with government subsidies of up to Rs. 78,000 for households. If you have a large home with energy requirements of around 1200 to 1500 per month, you can install a 10 kW solar system. It will help you offset around 40-50 units of electricity bill daily.

Is rooftop solar a good investment in India?

That's a return of nearly 20 times the investment. While payback estimates can vary, the impact of falling solar costs and rising electricity prices means rooftop solar is an extremely attractive financial proposition across India, allowing full recovery of costs in just 3-5 years, followed by over two decades of free and clean electricity.

With decreasing solar panel price, government subsidies, and the rising cost of electricity, installing a residential rooftop solar system is a smart and future-ready choice.
