

What changes have been made to Bess projects in Germany?

The German legal framework for BESS projects is currently also in a process of changes: The German parliament adopted a comprehensive energy reform package on 31 January 2025, which includes relevant changes for BESS projects with the aim to further support the growth of storage capacities in Germany.

Why are German banks expanding into Bess financing?

For debt, German banks are expanding into BESS financing with both floor-protected and merchant-based debt facilities. This is helped by BESS developers getting benefits from rising demand and evolving offtake contracts, offering strong 5-to-10-year terms.

Is Bess a good investment in Germany?

While the market fundamentals for BESS in Germany are among the most attractive in Europe, the regulatory framework is less favorable compared to countries like Italy and the UK.

How does Bess support Germany's energy transition?

By ensuring energy resilience, reliability, and sustainability, BESS aligns with Germany's vision for a carbon-neutral future and sets a benchmark for the global energy transition. Enabling Germany's Energy Transition requires an economically sustainable model to attract necessary private capital.

What happens if a Bess project comes online before August 2029?

Instead, BESS operators face structural disincentives, such as being classified both as generation and as load, which creates the risk of double grid fees. Currently, BESS projects that come online before August 2029 are exempt from paying grid fees, but it remains unclear what will happen after that date.

Could a German capacity market improve the bankability of Bess projects?

A German capacity market could further improve the bankability of BESS projects by providing contracted revenue streams. In countries like the UK and Italy, capacity markets have already proven valuable in supporting BESS financing by offering long-term, predictable income that complements merchant revenues.

Enabling Germany's Energy Transition requires an economically sustainable model to attract private capital. The following sections shall provide an overview of various technologies, use cases, revenue strategies, and how ...

The project in Meitingen which Bayernwerk commissioned recently, with the BESS provided by Intilion. Image: Felix Baptist / LEW. Utility and network operators ...

Which are your preferred offtake options for BESS assets? When we have a standalone, grid-connected BESS,

we look at tolling agreements or some profit-sharing mechanisms. This depends on our project finance ...

At a ceremonial signing on February 17, 2025, BPI and Chinabank formalized their commitment to fund the Magat BESS Phase 2, while BPI and BDO agreed to finance the Binga BESS project. The BESS projects, ...

Battery energy storage systems (BESS) store electricity and flexibly dispatch it on the grid. They can stack revenue streams offering arbitrage, capacity and ancillary services ...

The project in Meitingen which Bayernwerk commissioned recently, with the BESS provided by Intilion. Image: Felix Baptist / LEW. Utility and network operators RheinEnergie and Bayernwerk have respectively ...

Bringing it all together Elgar Middleton has extensive knowledge of, and experience in financing, co-located BESS, standalone BESS, BESS duration, warranty duration, cycling, degradation, floors, fixes as well as ...

The 209 MWh Standal battery energy storage project is expected to be fully operational by early 2026, one year before its seven-year tolling agreement comes into effect. ...

A BESS project in Germany the company recently connected to the grid. Image: Terralayr. We caught up with executives from BESS operator and aggregation platform Terralayr, after it raised EUR77 million (US\$80 million) for its ...

While common in the U.S. and China, particularly for standalone, front-of-the-meter, utility-scale installations, tolling agreements for BESS appeared for the first time in ...

The Ministry of Energy Transition and Water Transformation (PETRA), through the Energy Commission (EC), has launched an open bidding program for the acquisition of Battery Energy Storage System (BESS) capacity ...

Batteriespeicher als unverzichtbarer Teil der Energiewende In Deutschland steht die Energiewirtschaft vor gro#223;en Herausforderungen: die effiziente Nutzung erneuerbarer Energien bei gleichzeitig stabiler Stromversorgung. ...

Starting in 2026, the German TSO will begin paying BESS for providing inertia services, a crucial function for maintaining frequency stability, offering another ancillary ...

A 600MWh BESS project under construction in Germany from Eco Stor, most likely the largest to reach that stage. Image: screenshot of a video report from Schleswig-Holstein Magazin / NDR. The start of 2025 has seen ...

Battery energy storage systems (BESS) can help address the challenge of intermittent renewable energy. Large

scale deployment of this technology is hampered by perceived financial risks and lack of secured ...

January 24, 2025: German BESS developer Green Flexibility has secured an initial EUR400 million (\$413 million) pledge from Swiss private equity firm the Partners Group to expand battery ...
