

# Backup power battery project financing options in Spain 2026

Why do we need battery energy storage systems in Spain?

Due to the large capacity of installed hydroelectric and thermal storage systems and the resilience of the Spanish power grid, the need for Battery Energy Storage Systems (BESS) in Spain has been relatively low. The lack of a clear regulatory framework for BESS has also hindered its development in Spain so far.

How does the energy storage subsidy work in Spain?

Renewables Synergy: With 42% of Spain's 2022 electricity from renewables (Eurostat), the energy storage subsidy covers storage projects integrated with solar/wind farms- critical for stabilizing green energy grids. 3.

Can energy storage projects get 85% co-financing?

Standalone and renewables-plus-storage battery projects can apply for up to 85% co-financing, along with pumped hydro and thermal energy storage sites. Friday saw the publication of a call for applications for energy storage projects hoping to receive support from a EUR700 million (\$794 million) EU-funded program in Spain.

What is Spain's regulatory framework for energy storage?

Spain's regulatory framework for BESS is set in its Strategy for Energy Storage. The Strategy identifies the required regulatory measures - such as grid access, market structure, and addressing double tolling - that are currently needed to ensure the deployment of a solid energy storage market.

How much energy storage capacity does Spain have?

When it comes to installed energy storage capacity in general, Spain is one of the leading countries within Europe (see figure 2). Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country.

Can batteries improve the business case of wind and solar projects?

Batteries can improve the business case of wind and solar projects by providing a better utilization of the grid connection. This particularly holds in the context of Power Purchase Agreements (PPAs). PPAs are crucial to making wind and solar bankable, and Spain has been the biggest market for PPAs in Europe for years.

Axian Energy, a subsidiary of Madagascar-headquartered Pan-African business group Axian, announced on Tuesday that it has closed EUR84 million in financing for a solar ...

In Spain, AESC is carrying out important projects, in addition to the construction of the battery gigafactory, continues to establish strategic alliances with car manufacturers in ...

On April 28, 2025, a catastrophic blackout hit Spain and Portugal, plunging millions into darkness. Hospitals

# Backup power battery project financing options in Spain 2026

scrambled for backup power, trains stopped, and businesses lost billions. It was one ...

Why the Spain Solar Market is Thriving 1. Government Support: Spain's Ministry for Ecological Transition (MITECO) will fund up to 85% of project costs through matched financing, slashing ...

Car manufacturer Stellantis is still deciding whether to build a battery complex next to its car plant in Figuerelas near Zaragoza in Spain, in close cooperation with the Chinese cell manufacturer CATL. According to ...

As the photovoltaic (PV) industry continues to evolve, advancements in Port of Spain backup energy storage battery have become critical to optimizing the utilization of renewable energy ...

Iberia: Why are there no batteries in Spain? Spain's battery energy storage market is at a critical point. Despite being a leader in renewable energy deployment in Europe, the country has only ...

Adelaide, Australia - Amp Energy ("Amp"), a global energy transition platform backed by the Carlyle Group, has successfully closed project financing to construct the first ...

Conclusion Battery energy storage systems represent a keystone for the transition towards a more sustainable energy generation and utilisation. Despite the value and advantages that they offer to enhance grid ...

Energy sector stakeholders in Spain--including developers, investors, and infrastructure operators--face a critical year of legal and regulatory developments. Renewable ...

Source: European Commission Energy storage also reduces the need for fossil fuel power plants to operate as backup. This lowers greenhouse gas emissions and cuts fuel ...

The Spanish government say it will finance five hybrid battery energy storage projects, with a cumulative installed capacity of at least 600 MW. Each project can secure up to ...

Adelaide, Australia - Amp Energy ("Amp"), a global energy transition platform backed by the Carlyle Group, has successfully closed project financing to construct the first stage of its 250 MW / 500 MWh Bungama ...

Enlight expands its successful Gecama Wind Project, transforming it into the largest hybrid power complex of its kind in SpainThe project combines wind, solar, and utility ...

Spain's Ministry for the Ecological Transition and the Demographic Challenge (MITECO) has announced a major funding initiative worth EUR700 million to boost large-scale ...

With refinancing, you take a larger mortgage and use the balance to finance your project. Both options can

## **Backup power battery project financing options in Spain 2026**

earn you tax credits since they finance home upgrade projects. Battery Leases and Power Purchase Agreements Battery leases are ...
