

# Business energy storage tender price in Chile 2026

Is Chile preparing a tender mechanism for large-scale energy storage facilities?

The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities. The measure aims to maximize the use of renewable energy generated in the northern part of the country.

When will large-scale energy storage projects go online in Chile?

The Chilean authorities plan to hold the first procurement exercise for large-scale storage projects in 2024, with the first systems expected to go online in 2026. The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities.

Will Chile's storage capacity double in 2032?

The energy ministry spokesperson told Dialogue Earth that the country's environmental assessment body is currently assessing the viability of 300 more storage projects, with a total capacity of 16 GW. According to some projections, between 2026 and 2032, Chile's total storage capacity could double to 4 GW.

How much energy will Chile have by 2026?

According to estimates of the national electric system of Chile (SEN) cited by Americas Market Intelligence, the country will have 13.2 GWh/2 GW (6-8-hour duration) of operating energy storage by 2026. The northern regions of Antofagasta and Atacama account for nearly 5GW of the BESS pipeline.

How can Chile keep up with the changing energy demand landscape?

Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO<sub>2</sub>. In March 2024, BESS Coya, the largest battery-based energy storage system in Latin America, started operations.

Where are Chile's battery energy storage facilities located?

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage. The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's solar powerhouses.

Plans to invest \$USD 2 billion in large-scale energy storage by 2026 in the northern Atacama desert, in addition to 5.4 GWh of storage already in the procurement pipeline for 2027-2028.

o Chile's government plans to tender 2 GW of storage worth \$2 billion next year for commissioning in mid-2026. To run the tender, the government needs first to approve its energy transition law ...

# Business energy storage tender price in Chile 2026

The government of Chile will launch a bill this year to procure large-scale energy storage systems for commissioning in 2026 totalling US\$2 billion of investment, on top of 5GWh already being sought for 2027-28.

The New South Wales (NSW) government's largest energy storage tender in the state's history has now opened, offering support for up to 1 GW of projects that can each release energy into ...

Battery energy storage systems (BESS) projects developed by Statera Energy, SSE Renewables and Statkraft UK all secured contracts through NESO's Voltage 2026 tender, with a fourth contract awarded to a reactor in ...

Lessons Learned from Emerging Economies The Supercharging Battery Storage Initiative would like to thank all authors and organizations for their submissions to support this publication. This ...

Applications for Chile's 13GWh programme are open until Thursday 23 May 2024. Image: Atlas Renewable Energy The Chilean Ministry of Energy has opened a public ...

Chile is actively working towards achieving carbon neutrality by 2050, defined under the Ley Marco de Cambio Climático or Framework Law on Climate Change of 2022. Under this, the country has taken various regulatory ...

Set for completion in 2026, these systems are expected to boost grid stability and support Chile's decarbonization efforts by integrating more renewable energy into the grid ...

Spanish independent producer of renewable energy Grenergy has launched a reverse auction for the sale of 1.7 TWh/year of energy from its Chile-located solar PV and battery energy storage system (BESS).

The share of solar and wind energy in India's power mix was over 30% as of September 2024. The demand for utility-scale energy storage systems in India is primarily from ...

Three utility scale battery energy storage projects co-located with solar plants were announced last week in Chile. Enel is building a 67 MW/134 MWh battery, while CJR Renewable and Uriel ...

Chile Chile passed an energy storage and electromobility bill in late 2022, making stand-alone storage projects profitable for operators. However, the market is still awaiting new rules regarding a capacity payment for storage ...

He said that the goal is to tender these storage systems by 2024 and have them operational by the end of 2026. The planned energy storage projects will be located in various ...
