

Cheapest solar with battery installation offer in Belgium

Does Belgium pay for solar panels?

Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live. Go to an online simulation to find out more. In Wallonia, for example, this aid can cover a large part of the installation costs.

Can I install solar panels myself in Belgium?

There are several companies active in Belgium that install solar panels. There are no conditions specifically for the installation of solar panels, so it is possible to install the solar panels yourself. However, it is advisable to have these works carried out by a recognized technician who can also carry out an inspection immediately.

How does Belgium support solar panels?

Belgium encourages the use of solar energy by offering various forms of financial support. This support makes the installation of solar panels more affordable for many people. Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live.

Are solar panels self-consumption a good idea in Belgium?

In Belgium, many people are opting for self-consumption for their solar panels. Here's what it means and what the advantages are: You use the electricity generated by your panels directly. If you produce too much, you can sell the surplus to the electricity grid. The upside of self-consumption :

How much do solar panels cost?

The price of solar panels has dropped significantly in recent years. In addition, you can receive a subsidy from the government for photovoltaic panels. The average solar panel price is around EUR1.26 per watt peak (Wp), although the exact price depends on a number of criteria:

Should I buy a solar battery in Flanders?

It acts as a thermal battery and is way more profitable than a home battery, and the subsidy in Flanders (EUR 1080) covers almost a third of the whole thing. And have it connected to your solar panels for an additional subsidy (EUR400) and extra savings. The panels and inverters are all OK.

The table below gives you an overview of the average price for a solar panel system, based on your energy consumption or the number of people in your household. The prices shown include the solar panels, inverter and installation.

Solar panels and battery storage offer a reliable and resilient source of power, providing energy independence for homeowners. With a solar and battery system, you are not solely reliant on the grid for your electricity

Cheapest solar with battery installation offer in Belgium

needs. This can be ...

Optional battery storage Optimise your solar system and store excess energy for later. With a battery you'll get access to Octopus smart tariffs that maximise savings, and can even eliminate electricity bills.
