

# Domestic energy storage project financing options in Singapore 2025

Does Singapore need energy storage systems to manage solar intermittency?

However, the minister said there is a need to "step up energy storage systems to manage solar intermittency." Talks are currently ongoing with Sembcorp, the engineering conglomerate behind the 200MW/285MWh battery energy storage system (BESS) installation on Singapore's Jurong Island.

Why is Sembcorp launching a solar energy storage project in Singapore?

It was developed by Sembcorp in collaboration with the Singapore Energy Market Authority (EMA) after winning an EMA contract through a solicitation. With that one project, Singapore hits its 200MWh by 2025 energy storage target and minister Gan Kim Yong said it helps to "counteract sharp and unexpected drops in solar energy."

Why should Singapore set up a future energy fund?

It is thus imperative that we plan ahead and set aside resources for Singapore's energy transition including for new infrastructure depending on technological developments. The Government will therefore set up a Future Energy Fund to support infrastructure investments for our energy transition towards a net-zero future.

Is Singapore ready for solar energy in 2025?

Today, 903 megawatt-peak (MWp) of solar has been installed and we are on track to meeting our 2025 target. SERIS assessed that Singapore's technical potential of solar energy is ~8 GWp in 2050. Intermittency poses a key challenge of using solar energy - due to rain and cloud cover in our tropical climate.

Will Singapore add S\$5 billion to its future energy fund?

PHOTO: BT FILE THE Singapore government will add S\$5 billion to its Future Energy Fund, launched in 2024, to further support its goals to secure clean power, said Finance Minister Lawrence Wong in his Budget speech on Tuesday (Feb 18).

What are Singapore's Energy Solutions?

The proposed solutions include enabling more energy imports from abroad, and relying on a broad range of technologies within Singapore's borders, as well as upgrading the grid and speeding up connection times for new energy projects.

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia. The opening was hosted by the 200MW/285MWh ...

? How Can Companies Apply for Project Financing? Companies will need to contact either the bank or private lender offering the project loan. Keep in mind that these financial institutions ...

# Domestic energy storage project financing options in Singapore 2025

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy economy. Accelerated by DOE initiatives, ...
