

# ESS container project financing options in Greece 2025

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

Will energy storage help Greece achieve its energy transition goals?

1. In the coming years, energy storage is expected to play a key role in Greece's efforts to achieve its ambitious energy transition goals. This is highlighted by the target set in the country's National Plan for Energy and Climate, for the installation of eight gigawatts of energy storage capacity within the next ten years.

Does Greece have a Bess subsidy program?

Moving forward, Greece is abandoning subsidizing BESS via auctions. Instead, the country has recently launched a new program for 4.7 GW of unsubsidized BESS which will be offered priority grid connections on a merchant basis without subsidy support. What is the storage capacity requirement for ESS projects?

Exceptionally, in the context of the third auction and for ESS projects with a maximum total capacity of 50 MW, this storage capacity requirement is limited to 250 MWh, provided that the storage technology used is new and durable.

Can ESS project operators participate in an auction?

In order to be eligible to participate in an auction, ESS project operators should not have begun their construction prior to the submission of their offers, while for participants in the first auction, it is also stipulated that they must be endowed with a valid energy storage license.

F&#252;nf Hauptvorteile von ESS-Containern 1. Modulares und skalierbares Design Das Markenzeichen von ESS-Containern ist ihre Modularit&#228;t. Standardisierte Gr&#246;&#223;en ...

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted priority connection to the transmission or distribution grid and operated on a merchant ...
