

# Expected ROI of industrial battery cabinet project in Indonesia 2030

Can Indonesia capitalize on growing demand for lithium-ion batteries and EVs?

Indonesia can capitalize on rapidly growing demand for lithium-ion batteries and EVs domestically and globally. 35 million battery electric two-wheelers and 1.5 million battery EV cars.

What is the projected revenue of Indonesia battery market?

The battery market in Indonesia is expected to reach a projected revenue of US\$4,349.0 million by 2030. A compound annual growth rate of 23.7% is expected of Indonesia battery market from 2024 to 2030. The Indonesia battery market generated a revenue of USD 980.4 million in 2023 and is expected to reach USD 4,349.0 million by 2030.

Can Indonesia develop an integrated EV supply chain?

Indonesia wants to develop an integrated domestic EV supply chain, from mining and processing battery metals to the production of precursor cathode active materials, battery cells, battery packs, EVs, and eventually battery recycling.

What is Indonesia Battery Corporation (IBC)?

IBC striving to produce batteries domestically to become a global electric vehicle battery producer. Indonesia Battery Corporation is an initiative by the government to support Indonesia as a global electric vehicle battery producer.

How will Indonesia's battery project work?

He added that Indonesia's participation will cover the entire value chain of battery production, from mining to manufacturing. "This project will operate as one comprehensive package- from upstream mining to battery output," he cited.

How does Indonesia invest in EV batteries?

Upstream the supply chain, Indonesia leverages its nickel reserves and applies restrictive measures to attract foreign investment in nickel processing. Midstream and downstream, Southeast Asia's largest car market offers incentives for EV battery (component) producers, EV manufacturers, and EV buyers.

Lithium-ion battery storage is expected to see significant growth as the market matures and BTM applications gain traction, particularly in the commercial and industrial sectors. INDONESIA ENERGY STORAGE ...

Overview In 2022, Indonesia allocated over USD 3 billion in expansion and renovation of its transmission and distribution systems, one-quarter less than the average in the previous ...

The battery factory was inaugurated by then-president Joko Widodo on Mar. 7, 2024. The establishment of the
