

Expected ROI of industrial energy storage project in Bulgaria 2026

Why is energy storage growing in Bulgaria?

Energy storage in Bulgaria is expanding rapidly as the government awards nearly 10 GWh of capacity to 82 projects, boosting renewable energy reliability and grid stability.

How much money does the NRRP provide for energy projects in Bulgaria?

Under the RESTORE initiative, launched through Bulgaria's National Recovery and Resilience Plan (NRRP), the Ministry of Energy has selected 82 projects that will collectively receive BGN 1.15 billion (approximately \$675 million) in public funding.

How will the selected storage systems be distributed in Bulgaria?

The selected storage systems will be geographically distributed across Bulgaria and connected either to the national transmission grid or local distribution networks. All awarded projects must be operational by March 2026.

The development of Units 7 and 8 at Bulgaria's Kozloduy nuclear power plant is moving steadily forward, with the final investment decision expected in 2026, according to Petyo Ivanov, CEO ...

A total of 249 projects focused on renewable electricity production and energy storage, valued at nearly 268 million euros will be funded through Bulgaria's National Recovery ...

Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

Recently, Shanghai Sermatec Energy Technology Co., Ltd. achieved a major breakthrough in the European market by securing a 430+ MWh energy storage procurement ...

Bulgaria on Wednesday launched a long-delayed tender for at least 3,000 MWh of new energy storage capacity as part of its efforts to increase the share of renewable energy ...

Summary: Bulgaria's newly signed energy storage project marks a pivotal step in balancing renewable energy supply and grid stability. This article breaks down its technical scope, ...

The newly announced projects will help achieve this, providing an estimated 3 gigawatts of renewable energy and 1.2 gigawatts of energy storage. The projects will focus on solar and ...

Stankov also highlighted that this project is a crucial step towards achieving the national goal of 10 GWh of battery storage capacity by the end of next year. This ambitious ...

Expected ROI of industrial energy storage project in Bulgaria 2026

More ambitious projects - a European funded tender scheme for 1.4 GW/1.68 GWh renewables- plus-storage as well as 6 GWh of stand-alone storage - were previously announced but still ...

While growth has so far been driven primarily by residential storage systems in households, more and more energy suppliers, solar and wind farm operators, as well as industrial and commercial enterprises, are now ...

The announcements didn't give more information than that, but local reports said the four additional BESS units will total "at least" 279MWh. The reports indicate the hydropower plants are run-of-river, while NEK also has ...

Under the RESTORE initiative, launched through Bulgaria's National Recovery and Resilience Plan (NRRP), the Ministry of Energy has selected 82 projects that will collectively receive BGN 1.15 billion ...

The deadline for putting the project into operation is 31 March 2026. A key requirement is that a conceptual design of the project must be submitted in the application ...

"I am satisfied with the serious interest in the construction of renewable energy storage facilities. This ensures a significant increase in the share of renewable energy in the ...

On 21 August 2024, the Bulgarian Ministry of Energy opened a tender procedure for National infrastructure for storage of renewable energy (RESTORE) for granting stand-alone battery ...

Launched in August 2025, the project is expected to be operational by March 2026, with the integration into Bulgaria's energy grid anticipated for early 2026. Sermatec will provide ongoing ...
