

# Expected ROI of office building energy storage project in Greece 2025

How much power will Greece have by 2030?

The government now aims for 2.65 GW of battery projects on the transmission grid and a further 900 MW on the distribution grid. According to the Greek National Energy and Climate Plan (NECP), the nation aims to install 4.3 GW of storage by 2030.

Does Greece have a zero-subsidy battery system?

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions.

How many GW of battery projects will the government have?

The draft plan presented on February 21 ups the target from the initially planned 1.5 GW and far exceeds any deployment scenarios considered in the past. The government now aims for 2.65 GW of battery projects on the transmission grid and a further 900 MW on the distribution grid.

What does a draft ministerial decision mean for battery energy storage?

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted priority connection to the transmission or distribution grid and operated on a merchant basis without subsidy support.

Presenting to the Special Standing Committee on Environmental Protection of the Hellenic Parliament on June 25, 2025, Nikos Mantzaris, policy analyst and co-founder of ...

The EU executive approved on Tuesday under EU State aid rules Greece's request to offer financial help for two solar energy projects in the country that are expected to ...

The two projects of 30MW each, strategically located to enhance grid stability, have been fully environmentally licensed since 2024. When commissioned, they will serve as a ...

This initiative can play a key role in enabling the large-scale integration of energy storage systems into the national grid, which is essential for ensuring a more resilient ...

In total, new solar projects in 2025 are expected to make up more than 50% of the planned added utility-scale electric generation for 2025. Combined with planned battery storage capacity, the share is 81% of total ...

This investment is part of Greece's National Recovery and Resilience Plan, Greece 2.0, supported by European Union funding through NextGenerationEU. It falls under ...

## **Expected ROI of office building energy storage project in Greece 2025**

That's why people who calculate solar power return on investment carefully often find solar to out-return traditional investments in terms of both stability and predictability. ...

Jinko ESS has announced the successful signing of a 100 MWh energy storage project with a key client in Greece. The project will deploy 20 sets of Jinko ESS G2 5MWh ...

In 2025, over 31 GW of new storage capacity is expected to be built. California and Texas are the leaders in battery storage. The California Independent System Operator ...

That's why people who calculate solar power return on investment carefully often find solar to out-return traditional investments in terms of both stability and predictability. Factors Affecting Solar ...

A total of 43 projects were selected from 79 applications in Portugal's 2025 energy storage procurement. This included six projects from Spain's Iberdrola, which secured ...

Asia-Pacific (APAC) region is expected to dominate the global energy storage market, accounting for 49% of upcoming energy storage projects by 2030. Australia, China and India are among ...

The strategic agreement was signed with a key Greek partner and marks a significant milestone for Chinese storage technology in Europe's accelerating energy transition. ...

The Greek Ministry of Energy and Infrastructure has increased its target for a merchant standalone battery energy storage system (BESS) rollout to 3.55 GW against the background of a rising demand for flexible power and ...

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in ...

The development of the national energy and climate plan for 2030, combined with Greece's energy privatisation plan and the impressive increase in renewable energy sources (RES) potential in its power production, ...
