

# Government procurement price of LFP battery system in Romania

How much LCoS does a battery cost in Romania?

To be considered profitable, the LCOS of the battery must be less or equal to electricity unit price paid by the customer. The electricity price considered for Romania is 0.1734 EUR/kWh, which is the average price in the first quarter of 2021, according to EU statistics .

Are there commercially available batteries on Romanian market?

The analysis presents the commercially available batteries on Romanian market, the technical performances of each battery, the costs involved in this decision, the opportunity to reduce their investment and indicates the most profitable battery obtained after LCOS method is performed.

Are battery technologies profitable in Romania?

Profitability evaluation for 5 types of battery technologies in Romania. BESSs costs were obtained from Romanian market analysis. LCB technologies are the most feasible from the examined BESSs. A sensitivity analysis with respect to cost parameters is presented. The variation of capital expenditure has the highest influence on LCOS values.

Are AGM VRLA batteries profitable?

As can be observed, the AGM-VRLA battery has higher values than the profitability threshold, followed by Gel-VRLA battery and AIHB battery, for both LCOS1 and LCOS2, even if CAPEX decreases by 40 %. Thus, AGM-, Gel-VRLA and AIHB batteries are not profitable, in both studied situations.

Where can I buy a Bess battery in Romania?

If the BESS may be purchased directly from the manufacturer in some countries, most manufacturers do not have retail stores in Romania. The battery is purchased from either the distributor, who can offer free shipping, or from the manufacturer with stores in other countries and adds the costs for shipping.

Where does LFP spot price come from?

LFP spot price comes from the ICC Battery price database, where spot price is based on reported quotes from companies, battery cell prices could be even lower if batteries are purchased in high volume. Estimated cell manufacturing cost uses the BNEF BattMan Cost Model, adjusting LFP cathode prices with ICC cathode spot prices.

Introduction: Offgrid Tech has been selling Lithium batteries since 2016. LFP (Lithium Ferrophosphate or Lithium Iron Phosphate) is currently our favorite battery for several reasons. They are many times lighter than lead ...

Lithium battery price in 2025 averages \$151/kWh, with EV packs from \$4,760-\$19,200. Prices keep falling

# Government procurement price of LFP battery system in Romania

due to tech advances and lower material costs.

Understanding Government Procurement in Romania Government procurement services are essential for facilitating transactions between the public sector and private ...

Fresh and verified Tenders from Romania. Find, search and filter Tenders/Call for bids/RFIs/RFPs/RFQs/Auctions published by the government, public sector undertakings ...

The Ministry of Energy has recently announced a call for proposals to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, worth EUR199 million and funded through the NRRP.

Hidroelectrica to add large battery to Iron Gate 2 hydroelectric plant State-owned Hidroelectrica, the largest electricity producer in Romania, wants to install a battery storage ...

Therefore, procurement professionals must thoroughly understand the various types of battery storage technologies, their unique advantages and limitations, and carefully ...

In 2025, US lithium-ion battery buyers face an unprecedented challenge: a sweeping 145% tariff on cells imported from China. As solar installers, EV manufacturers, and data-center operators wrestle with ...

In this article, Preetesh Singh - Specialist, CASE and Alternate Powertrains at Nomura Research Institute, summarises the efforts of different players in the Li-ion battery ...

The global battery energy storage system market size was estimated at USD 10.16 billion in 2025 and is anticipated to grow from USD 12.61 billion in 2026 to USD 86.87 billion by 2034, growing ...

Monsson inaugurated a 24 MWh battery energy storage system in Romania. It is the first phase out of 216 MWh planned in total. The facility is connected to the company's ...

Base year costs for utility-scale battery energy storage systems (BESS) are based on a bottom-up cost model using the data and methodology for utility-scale BESS in (Ramasamy et al., 2022). The bottom-up BESS model accounts for ...

In this article, Preetesh Singh - Specialist, CASE and Alternate Powertrains at Nomura Research Institute, summarises the efforts of different players in the Li-ion battery value chain and the direction the Indian ...

Like its fellow Norwegian-founded peer Freyr, Morrow is - at least with its first phase - primarily selling into the energy storage system (ESS) market. It is selling lithium iron phosphate (LFP cells) to system integrators ...

## **Government procurement price of LFP battery system in Romania**

Procurement Resource provides latest Lithium Iron Phosphate prices and a graphing tool to track prices over time, compare prices across countries, and customize price data.

E-Bids are invited through the electronic tendering process and the Tender Document can be downloaded from the e-Tender Central Public Procurement Portal (CPPP) of Government of ...
