

# Government procurement price of MW scale storage system in Croatia

What does the ceeag measure mean for battery storage in Croatia?

(65) The Commission notes that the measure aims at the promotion of the establishment of a utility-scale battery storage in Croatia, which qualify as energy storage facilities under point 19(33) of the CEEAG.

Can a TSO own a storage facility in Croatia?

(9) Croatia has implemented Articles 36 and 54 of Directive 2019/944 on common rules for the internal market for electricity<sup>6</sup> in the Electricity Market Law (10/2021). This law does not allow TSO and Distribution System Operators ("DSO") to own and operate storage facilities.

What is the funding gap in Croatia?

Tax rate at 18 % (statutory tax rate in Croatia). Debt to Equity ratio of 16.08 %, based on the expected share of debt on the 31st December 2024. (49) Therefore, the Croatian authorities explained that the funding gap amounts to EUR 21.029 million, without any support measure.

How many lithium-ion battery storage projects are there in Europe?

The Official Database of the European energy storage technologies and facilities, Data Europa EU, states that there are currently 100 operational lithium-ion battery storage projects in the EU with a total of only 490 MW of installed power capacity, which underlines the need for the supported project.

Is IE-energy related to any TSO or DSO operating in Croatia?

IE-Energy is unrelated to any TSO or DSO operating in Croatia or elsewhere. IE-Energy d.o.o. is a new entrant in the market for balancing services to TSOs. (21) The project has been selected following a call for proposals related to the Modernisation Fund<sup>14</sup> published in November 2020 by Croatia. A second call was published in November 2021.

How much solar capacity will Croatia have in 2022?

The country might only add 2.5 MW of new solar capacity in 2022, and another 19 MW next year, according to the consulting firm. The International Renewable Energy Agency (IRENA) says that Croatia had 309 MW of installed PV capacity at the end of 2021. GlobalData expects the country to reach 770 MW of cumulative solar capacity by 2030.

Installations in CAISO accounted for 21% of existing large-scale battery storage power capacity in the United States in 2018, but they accounted for 41% of existing energy capacity. In 2013, the ...

Eskom's problems have worsened still since it held the 1,440 MWh procurement, with a rash of recent and ongoing, unplanned outages at fossil fuel plants. In April Cape Town's Mayor said the city would look to deploy ...

# Government procurement price of MW scale storage system in Croatia

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in ...

The event where the announcement was made. Image: Energija Balkana video. EPCG, a utility and distribution network operator (DNO) in the Southeast European country of Montenegro, is looking to add ...

Will Croatia build Europe's largest energy storage project? Croatia is preparing to build Eastern Europe's largest energy storage project. IE Energy has secured EUR19.8 million (\$20.9 million) to ...

These solutions include the EVu system, a tower which enables the integration of a gravity system for energy storage in high-rise buildings through hollow structures over 300 meters and up to ...

IE Energy, a Croatia -based energy storage operator, is set to build a 50 MW storage project, after securing EUR19.8 million from the Croatian government via state aid from the European...

It will amount to an initial capacity of 10 megawatts (MW) and 22 megawatt-hours (MWh) which can be increased up to 50MW/110MWh. The aid will take the form of a direct grant and will cover approximately 30 per cent of ...

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery ...

IE-Energy, a startup company based in Rijeka, received approval for a subsidy of 19.8 million euros for the project to build an electrical energy storage system at the grid level.

Croatia investing in storage amid slow solar development Croatia is preparing to build Eastern Europe's largest energy storage project. IE Energy has secured EUR19.8 million (\$20.9 million) to ...

In Spring 2024, the Ontario government secured nearly 3,000 MW of capacity, including the largest battery storage procurement in Canada's history. Ontario's electricity system is among the cleanest in the world, ...

Croatia's first large-scale battery energy storage system (BESS) with 66 MW capacity should be completed and commissioned in 2025, its investor IE Energy told Montel on Thursday.

What is grid-scale battery storage? Battery storage is a technology that enables power system operators and utilities to store energy for later use. A battery energy storage system (BESS) is ...

How much ie-energy aid will Croatia get? The European Commission has approved EUR19.8 million

# Government procurement price of MW scale storage system in Croatia

(US\$20.1 million) in state aid from the government of Croatia to energy storage operator IE ...
