

Government procurement price of school solar storage in Australia

Which NSW public schools will receive solar and battery energy storage systems?

An additional 18 NSW public schools will receive solar and battery energy storage systems and join the Virtual Power Plant trial as part of the Smart Energy Schools Pilot project. Weilmoringle Public School has joined the Smart Energy Schools Pilot Program to help test the use of off grid renewable energy solutions in isolated schools.

How many schools in NSW have solar energy systems?

Around 1,500 NSW public schools across the state have already installed 17 megawatts of solar energy systems. These systems are capable of generating enough energy to power 3,000 NSW homes, saving almost 17,000 tonnes of carbon emissions each year. But energy systems are rapidly transforming.

Should Australian schools use solar energy in 2025?

The costs and benefits of solar energy make it a practical and impactful choice for Australian schools in 2025. With significant savings, enhanced sustainability, and valuable educational opportunities, solar power is more than an energy solution; it's an investment in the future of education and the planet.

Will solar power save schools money?

As most financial savings will come from reducing the amount of power schools need to purchase, schools can estimate how much this will be by calculating how much electricity the solar power system will generate and multiplying this by the current energy retail price.

Can schools buy solar power?

Additionally, schools must not enter Power Purchase Agreements (PPAs) with solar power providers to install systems and purchase the electricity output. The Victorian Government's State Purchase Contract (SPC) arrangements for electricity supply to government buildings include government schools.

How can Australian schools offset solar installation costs in 2025?

In 2025, Australian schools can access several financial incentives to offset solar installation costs: Small-Scale Technology Certificates (STCs): Schools can receive STCs based on the system size and location, reducing upfront costs by up to 30%.

Solar Battery Prices and Payback Times Solar battery payback times have never looked better, with some of SolarBright's specials seeing payback periods under 3 years. This guide covers current battery prices, new rebates from the Federal ...
