How much does the NYSERDA energy storage incentive program cost?

The total proposed budget for evaluation of the NYSERDA Energy Storage Incentive Program is \$5.0 million from 2019 through 2025. This aggregate budget will be managed over the duration of the Program in consultation with DPS staff to deliver these studies and others as may be needed.

What is the PSC's storage goal for 2025?

Following additional stakeholder input including three technical conferences, hearings, and written comments, the PSC issued an order on December 13, 2018, establishing a 2030 storage goal of 3,000 MW and an intermediate target of 1,500 MW by 2025.

Where can I find the energy storage incentive levels?

The current incentive levels will be available on the NYSERDA Energy Storage Program website. All projects will reserve and lock in their incentive rate at the time a completed application is submitted and approved by NYSERDA. Projects up to 20 MW will have 18 months to achieve commercial operation upon receiving the incentive award.

Can a New York energy storage system be relocated?

The energy storage system must be comprised of new products, electrically interconnected within New York, and that are NYISO-eligible to provide energy, capacity, and/or ancillary services. The storage system may not be relocated within New York without NYSERDA's written approval.

What is the energy storage plan?

This Plan is submitted pursuant to the Storage Order and describes initiatives that will leverage market acceleration incentive funds to valuably and cost-effectively achieve approximately two-thirds of the State's goal of 1,500 MW of energy storage by 2025.

How much money does NYSERDA need to build a self-sustaining storage market?

Within the \$350 million authorized for bridge incentives in the Storage Order, \$70 million is not currently allocated to either of the two proposed initiatives in this Plan. Instead, NYSERDA will request DPS approval to allocate these funds for opportunities that have the greatest potential to build a self-sustaining storage market.
