

# Home energy storage project financing options in Spain 2030

Will Spain start a new energy storage scheme?

The Ministry of the Environment of Spain has launched its latest financial support scheme for energy storage, aiming to kickstart 2.5-3.5GW.

Can Spain deploy large-scale energy storage with co-financing of 85%?

The European Commission on Monday greenlit a new aid scheme to enable Spain to deploy large-scale energy storage with co-financing of up to 85%. The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain.

How will the European Commission support large-scale energy storage in Spain?

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for standalone energy storage sites, projects installed alongside renewable energy facilities, and storage planned as part of thermal power plants.

What will Spain's energy plan look like in 2030?

By 2030, Spain expects to install 22.5 GW of energy storage projects, including included battery energy storage, pumped hydropower and solar thermal plants. The plan also aims for 76 GW of solar power, 62 GW of wind power, which includes 3 GW of offshore wind, along with 1.4 GW of biomass projects.

How much money will Spain spend on energy projects?

Nearly half of the financial support will be allocated to the southern region of Andalusia, with EUR311 million, followed by the northwestern region of Galicia with EUR86 million and the central region of Castilla-La Mancha with EUR80 million. The projects will make the energy system in Spain more flexible, robust, and resilient, MITECO said.

Does Spain support energy storage?

Spain already backs energy storage with more than EUR600 million of NextGenEU funding which was allocated as part of Spain's, post-Covid Recovery, Transformation, and Resilience Plan. From pv magazine España; a.

In line with the National Integrated Energy and Climate Plan 2021-2030 where the Government has developed a new regulatory framework for renewables and a national strategy for self-consumption, among others, the ...

The target for energy storage has been increased from 20GW in the previous NECP to 22.5GW by 2030. Image: Iberdrola. Spain has increased its energy storage target by ...

Renewable energy will cover almost half of the world's electricity demand by 2030, according to the
