

# Hybrid solar inverter project financing options in Spain 2026

What financing options are available for solar projects in Spain?

Power Purchase Agreements (PPA's) and Crowdfunding are two exciting forms of funding that have entered the solar sector here in Spain. These methods of financing are particularly interesting to businesses and communities. Finance is also available to residents of Spain who have a regular payment into a Spanish bank account.

Why should you invest in solar in Spain?

There has never been a better time to invest in renewable energy and Solar in Spain is now able to offer a complete Key-in-Hand solution including finance options. Many new types of loans have recently been introduced to help businesses and homeowners invest in solar energy.

How much does a 'hybrid' project cost?

After repaying existing debt and covering reserves and costs, over \$150 million of the loan will fund the hybrid project's construction, which is estimated to cost \$195-205 million. The remaining cost will be covered through equity. This hybridisation aims to improve grid stability after the country's recent extended blackouts.

Will a hybrid power system improve grid stability after blackouts?

This hybridisation aims to improve grid stability after the country's recent extended blackouts. According to the Israeli IPP, the Gecama project is one of the first in Spain to include a utility-scale battery energy storage system (BESS) to support peak shifting by storing electricity when prices are low and discharging during high-demand periods.

What is Enlight's new solar project?

The project will feature 403MW of solar PV and 688MWh of energy storage and is expected to be operational in the second half of 2026. Additionally, Enlight financed its 290MW/940MWh Roadrunner solar-plus-storage project, located near Tucson, Arizona, known as Apache Solar II.

Enlight expands its successful Gecama Wind Project, transforming it into the largest hybrid power complex of its kind in Spain. The project combines wind, solar, and utility ...
