

# Hybrid solar storage tender price in China 2026

Will China install energy storage in 2026?

S&P Global Commodity Insights forecasts that China will install 44 GW/116 GWh energy storage in 2026, which is 36% less capacity than its projection for 2025. The rush to install PV and storage in 2025 will likely affect 2026 deployment. China's share of global annual installations is set to drop by 7% for PV and 15% for storage from 2025 to 2026.

How much does energy storage cost in China?

In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4. The tender attracted 76 bidders, with quoted prices ranging from \$60.5/kWh to \$82/kWh, averaging \$66.3/kWh.

How will the rush to install PV & storage affect 2026 deployment?

The rush to install PV and storage in 2025 will likely affect 2026 deployment. China's share of global annual installations is set to drop by 7% for PV and 15% for storage from 2025 to 2026. This will push Chinese manufacturers to expand more aggressively to overseas markets.

Which region has the most solar PV inverters shipped in 2024?

The Asia Pacific (APAC) region has accounted for 69% of the 589GW solar PV inverters shipped in 2024, according to a report from analyst Wood Mackenzie.

How much solar capacity will China have in 2025?

This included 23.4 GW of capacity from utility-scale solar projects, up 7% year on year, and 36.3 GW from distributed PV, up 52% on the previous year. China's PV installations therefore remain robust, with added capacity forecast at 310 GW for 2025 - half of expected global solar installations.

Why is distributed PV a major contributor to China's growth?

Distributed PV is expected to be a major contributor due to quick installation timelines. In the first quarter of 2025, China added 59.7 GW of PV, a 31% year-on-year increase. This included 23.4 GW of capacity from utility-scale solar projects, up 7% year on year, and 36.3 GW from distributed PV, up 52% on the previous year.
