

Industrial battery cabinet project financing options in Indonesia 2025

How will Indonesia's battery project work?

He added that Indonesia's participation will cover the entire value chain of battery production, from mining to manufacturing. "This project will operate as one comprehensive package- from upstream mining to battery output," he cited.

Why is Indonesia building a battery manufacturing facility?

With this groundbreaking, Indonesia is not only building a manufacturing facility -- it is shaping a future as a global leader in battery technology and renewable energy. By leveraging its vast nickel reserves, Indonesia takes a bold step toward energy independence and economic resilience.

How much did Indonesia invest in the EV battery project?

With a staggering investment of USD 5.9 billion (approximately IDR 96 trillion), the project marks a monumental step in placing Indonesia at the forefront of the global EV battery supply chain and advancing its green energy ambitions.

Can Indonesia become a leader in EV & battery industry?

As one of the fastest growing economies and the world's largest producer of nickel (a key component in lithium-ion batteries), Indonesia has huge potential to become one of the leading forces in the EV and battery industries of the future.

Is CATL involved in the Indonesia Project?

According to Caixin, CATL's involvement in the Indonesia project dates back to April 2022, when CBL signed an agreement with ANTAM and IBC to jointly develop a full industrial chain--from nickel mining to battery production--with a planned construction period from 2022 to 2026. Few updates have been released since then.

Who owns PT Contemporary Amperex Technology Indonesia battery?

The battery factory in Karawang, occupying 43 hectares, is operated by PT Contemporary Amperex Technology Indonesia Battery (CATIB), a joint venture between IBC and CBL, a subsidiary of global battery giant CATL. The facility is expected to reach an initial capacity of 6.9 GWh in the first phase, increasing to 15 GWh in the second phase.

We reveal full details of the \$711 million financing for the EV battery plant in Indonesia and examine how the country is hoping to emerge as a major force in the EV supply chain, both regionally and globally.

President Prabowo Subianto Monday (06/29) officiated the groundbreaking of SEA's largest integrated EV battery project by the ANTAM-IBC-CBL consortium at Artha Industrial Hills (AIH) ...

Contemporary Amperex Technology Co. Ltd., the world's top maker of electric vehicle batteries, is seeking a loan of about \$1 billion to fund an investment in Indonesia, according to people ...

We reveal full details of the \$711 million financing for the EV battery plant in Indonesia and examine how the country is hoping to emerge as a major force in the EV supply ...

A few years ago, Indonesia banned the export of nickel ore. The explicit goal of this policy was to boost downstream industrial capacity by forcing companies to build smelters ...

This webinar is ideal for anyone involved in the implementation of battery energy storage projects at their facilities and will provide valuable insights and strategies for successful deal design ...

The United Nations Economist Network (UNEN) has released a Policy Brief on Industrial Policy for Sustainable Development, outlining how countries worldwide are reshaping their economic strategies to align with ...

This project strengthens Indonesia's position in nickel production, leveraging substantial financial backing and a long-term resource agreement. The collaboration between ...

Five sub-projects in East Halmahera, North Maluku, focusing on nickel mining, smelting, precursor production, cathode manufacturing, and battery recycling. This ensures ...

Indonesia's decision to join the New Development Bank (NDB) under the BRICS framework presents an opportunity to accelerate its green industrial policy. As the country transitions toward a more sustainable ...

Cabinet Secretary Teddy Indra Wijaya (center) accompanies Indonesian President Prabowo Subianto to inaugurate the ground breaking of an integrated electric vehicle battery industry ecosystem at Artha Industrial Hills, ...

This article will explore the top 10 largest industrial estates in Indonesia in 2025, highlighting their land area, key industries, notable tenants, and contributions to the nation's economic growth.

The battery factory was inaugurated by then-president Joko Widodo on Mar. 7, 2204. The establishment of the battery factory signifies Indonesia's commitment to enter the global lithium-ion battery and EV ...

"Danantara is stepping in to help with financing because we see the immense potential in this project - not only in terms of returns but also in job creation," he said. He ...

Indonesia Battery Market Size - Industry Report on Share, Growth Trends & Forecasts Analysis (2025 -

Industrial battery cabinet project financing options in Indonesia 2025

2030) The Indonesia Battery Market report segments the industry into Technology (Lithium-ion Battery, Lead-acid ...

Additionally, the Battery Energy Storage System (BESS) portion of the project could have separate financing terms and investors, as it would likely qualify for a 2025 ...
