

# Large scale battery storage project financing options in Chile 2025

How much battery storage does Chile have?

Chile has an operational installed capacity of approximately 1GW in batteries, and another 3GW is under construction. Battery storage has been largely financed by bank lending in recent years, but we believe larger projects could increase the scope for bond financing.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

How much does a battery cost in Chile?

In fact, batteries charged at nearly \$0/MWh during the day in the sunny, northern desert regions of Chile, sell energy at night for over \$100/MWh. Although projects such as Engie's BESS Coya are already enjoying these large spreads, this capacity payment will partially de-risk Chile's dependence on volatile, but still profitable, merchant revenues.

Will new solar assets in Chile have storage components?

New utility-scale renewable and PMGE assets in Chile (most of which are distributed solar plants smaller than 9 MW) will likely all have storage components moving forward.

Why are project finance transactions increasing in Chile?

Fitch Ratings-Sao Paulo/New York-01 April 2025: Project finance transactions in Chile are expected to increase due to the recent commissioning of large battery energy storage systems (BESS), Fitch Ratings says. This should balance electricity supply and demand while reducing price volatility for renewable energy generators.

How can battery storage help reduce the financial impact of curtailment?

Battery storage systems can capitalize on this arbitrage opportunity and help reduce the financial impact of curtailment in hybrid solar power plants until large transmission line projects become operational, stabilizing cashflows. Chile has an operational installed capacity of approximately 1GW in batteries, and another 3GW is under construction.

Saudi Arabia has officially connected its largest battery energy storage system (BESS) to the grid, marking a significant milestone in the country's renewable energy expansion. The project ...

The EPC agreements will bring 190.5 MWp of solar power and 2,500 MWh of battery energy storage system capacity. Their projects could also help expand Chile's solar power and energy storage capacity by developing

# Large scale battery storage project financing options in Chile 2025

...

Battery energy storage systems (BESS) can help address the challenge of intermittent renewable energy. Large scale deployment of this technology is hampered by perceived financial risks and lack of secured ...

CVC DIF, the dedicated infrastructure investment strategy of leading global private markets manager CVC, is pleased to announce that it has agreed to acquire the ...

Repsol Energy Storage and Battery Initiatives for 2025: Key Projects, Strategies and Market Impact Repsol's Renewable Revolution: Powering a Sustainable Future with ...

Despite the growing attention to grid-scale battery storage, large-scale deployment began globally in the late 2010s and in Japan around 2023. As such, the sector is still in its early stages of ...

Last week, three large-scale battery energy storage projects, co-located with solar plants, were announced in Chile. Enel is constructing a 67 MW/134 MWh battery, while ...

24 January 2025, Santiago, Chile -- DNV, the global independent energy expert and assurance company, provided expertise and market due diligence, that has been instrumental in helping ...

DNV has enabled Zelestra to secure a \$282 million green financing package for Chile's Aurora project--a landmark 220 MWdc solar PV and 1 GWh battery storage hybrid facility.

DNV, the independent energy expert and assurance provider, has enabled Zelestra to secure a \$282 million green financing package for Chile's Aurora project--a ...

However, in recent years, Chile has been facing some serious issues: curtailment and marginal costs nearing zero. With solar project owners needing to find a solution to make their projects financially viable, battery ...

Project Arena, a 220 MW / 1,100 MWh battery energy storage system (BESS), will be one of the first large-scale standalone BESS projects in Chile to reach commercial ...

The initiative supports countries around the world in co-creating strategies that enhance policy, regulation, supply chain, manufacturing, and financing solutions for battery energy storage ...

The companies previously announced they would partner to develop two large-scale, hybrid solar PV and battery storage projects with a combined generation capacity of 232 ...

As energy storage becomes increasingly critical for grid stability, DNV continues to support developers, financiers and offtakers navigate the technical and commercial ...

# **Large scale battery storage project financing options in Chile 2025**

CVC DIF has agreed to acquire a utility-scale hybrid PV-BESS energy project in Chile from Grenergy. The project is currently under construction in Northern Chile and ...
