

Portable ESS system project financing options in Nepal 2030

Are the SDGs integrated into Nepal's national plans?

The SDGs have been integrated into Nepal's national plans, including the 15th National Development Plan and the national SDG Status and Roadmap (2016-2030) document. However, as with many other countries, there exists a wide institutional disconnect between the planning process and budgeting and financing processes for development.

How will the NEA finance Hy-dropower projects in Nepal?

The NEA anticipates developing more than 4,000 MW of hy-dropower projects between 2020 and 2030 through subsidiary companies. This will require a paradigm shift in the way Nepal approaches energy sector financing. Recently, Nepal has poorly utilized the public and private sources of financing available to the sector.

How much infrastructure investment does Nepal need?

The estimates show that Nepal needs the infrastructure investment of least 8 to 12 percent of GDP until 2020 to adequately develop its infrastructure. Transport infrastructure sector alone shows that between present investment NRS 44 billion (USD 440 million) against an estimate of NRS 370 billion (USD 3.7 billion) the ratio is eight-fold.

How can institutional investors mobilise more funding from Nepal?

Given that the combined asset size of the local institutional investors is more than 15 percent of GDP (US\$4 billion), there is potential to mobilize higher amounts of financing from Nepal's institutional investors by addressing regulatory and institutional barriers.

Do Nepalese citizens have reliable and adequate access to infrastructure services?

However, currently, Nepalese citizens do not have reliable and adequate access to infrastructure services. For real benefits to accrue, the quality and sustainability of services need to improve, with substantial and efficient investment.

What is the funding gap for road maintenance in Nepal?

An alternative funding source is available through the Roads Board of Nepal (RBN), which, per the RBN Act, collects and allocates funds for road maintenance. On average, the funding gap was 68 percent between 2014 and 2018 (table 9).
