What is a good price per watt for rooftop solar?

A good price per watt for rooftop solar provides a balance of savings potential and robust warranty and service coverage. Based on recent solar pricing trends from the SEIA, this balance can be found in the \$3-4 per watt range for residential solar projects.

Is rooftop solar a good investment?

At its core, rooftop solar is a way to pre-purchase 25 years of electricity in order to hedge against ever-rising utility rates - quite similar to buying bulk coffee grounds instead of individual Venti Lattes from Starbucks. The return on this long-term investment depends on a handful of key factors, including the price of the solar system itself.

Are solar batteries worth it?

Solar batteries are expensive, but financial incentives are available to lower the cost. Prices often depend on the battery's storage capacity, expected life span, brand and other factors. Homeowners often find that solar batteries are worth it for energy security-- even if they're not worth it financially.

Which battery is best for solar energy storage?

Very popular for solar panel system energy storage due to their longevity and lack of fumes due to their sealed container. The Absolyte GP industrial sealed battery by GNB Industrial Power is a VRLA battery that does not require added water for the life of the battery.
