

# School solar storage supplier quotation in Poland 2026

What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

How will the energy storage industry evolve in 2024-2025?

A rapid increase in the number of energy storage installations is expected in 2024-2025. This will be an important step in modernizing the Polish energy sector and strengthening the position of prosumers in the market.

Are subsidies available for energy storage facilities?

Subsidies are available for energy storage facilities, as long as they are integrated with the energy source being implemented as part of the investment. The program provides support covering up to 20% of eligible costs. The continuation of both programs is planned with a larger budget.

How much money will Poland receive from the modernization fund?

Funding for the program comes from the Modernization Fund (FM), which underscores the importance of the project for modernizing the energy system. By 2030, Poland could receive about 60 billion zlotys from the FM for energy transition goals. The call for applications runs from June 17, 2024 to June 16, 2025, or until funds are exhausted.

How much zloty will be provided in 2026?

The call for proposal's budget is 893,460,000 zloty. The aid will be provided in the form of subsidies of up to 45% of eligible costs which may be spent by 30 June 2026 at the latest. Proposals may be submitted until 14 March 2025.

Our offer includes a full range of manufacturer's devices, and these are: string inverters, hybrid and energy storage, and from October also chargers for electric cars and adapters for heat pumps.

Energy storage subsidy programs in Poland are a key component of the country's energy transition. These initiatives support prosumers, businesses and farmers, influencing a greater share of renewables in the energy mix and improving the ...
