What is the EU-China solar panel dispute?

The EU-China solar panel dispute has been an important chapter in global trade, focusing on accusations of dumping. The European Union claimed China was selling solar panels in Europe at unfairly low prices, supported by Chinese government subsidies. This practice hurt European manufacturers, who couldn't compete with such low prices.

Is China a good place to buy solar panels?

If you're diving into the world of solar energy--whether it's for your home, your business, or a sprawling solar farm--you've probably realized that China is where the action is. Producing over 70% of the world's solar panels, China is home to some of the biggest, most innovative, and downright impressive manufacturers out there.

How much does a PV module cost in China?

According to price analysis firm InfoLink: "Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark." The results of the China Datang Group's 2025-2026 PV module framework. Image: Datang.
