

# Solar plus storage tender price in Romania 2026

How much does Romania spend on battery energy storage in 2026?

Romania has also earmarked EUR 199 million to support new capacities for the production and recycling of batteries and solar cells and panels. With this reopened bidding, the ministry aims to see the two-hour duration battery energy storage system (BESS) facilities up and running by mid-2026. The budget for the BESS projects is EUR 79.6 million.

Will Romania reopen a call to support battery storage projects?

Romania's Ministry of Energy has reopened its call to support projects of battery storage for renewable energy integration, seeking at least 240 MW and 480 MWh of resources. The original call, which referred to at least 620 MWh, was expected to see projects selected by the end of 2023, according to reports.

Does Romania have a solar PV market?

Our sister site PV Tech has covered Romania's solar PV market extensively. The Ministry also announced a EUR 199 million call to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, also funded through the NRRP, with EUR 149.25 million for new battery production, assembly and recycling facilities.

How much solar capacity does Romania have in 2023?

According to the latest market data, the Romanian solar PV market added more than 1 GW of newly installed capacity and scored a remarkable 308 % increase compared to the previous year's growth. Thus, Romania reached a cumulative solar capacity of 2.9 GW at the end of 2023. Romania Solar Resource Potential

How much money will Romania spend on solar projects?

Meanwhile, the remaining EUR 49.75 million is intended for new projects in Romania that would add solar PV cell and module (panel) production, assembly and recycling capacity to the tune of at least 200 MW per year by mid-2026.

Does Romania have a good solar resource potential?

Romania has very good solar resource potential as the geographical location is favourable for utilising solar energy. Romania is located in an area with a solar potential of 210 sunny days per year and with an annual solar energy flux between 1,000 kWh/m<sup>2</sup>/year and 1,300 kWh/m<sup>2</sup>/year.

A co-located solar PV and battery storage project in Germany. Image: Baywa r.e. The German Federal Network Agency (Bundesnetzagentur) has awarded 587 MW of solar-plus-storage in its latest Innovation Tender. As ...

Romania has also earmarked EUR 199 million to support new capacities for the production and recycling of

batteries and solar cells and panels. With this reopened bidding, the ministry aims to see the two-hour duration ...

The electricity market operator OPCOM has published the list of 21 companies with which contracts were signed after the completion of the first auction related to the Contracts for Difference (CfD) mechanism 21 companies ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in northwest of the ...

A Prime Batteries BESS unit at a separate project in Romania. Image: Prime Batteries Technology / EIT InnoEnergy. Power generation firm Hidroelectrica has enlisted local firms Prime Batteries Technology and Enevo ...

Romania's energy ministry has re-launched a competitive tender for battery storage projects, seeking to have at least 240MW/480MWh of energy storage facilities up and ...

In 2024, Cyprus turned heads by launching a solar-plus-storage tender that reads like a renewable energy wishlist. The catch? Winners must guarantee 4 hours of backup ...

Romania aims to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by 2026 under a plan that is seen to help it cope with high energy ...

Germany has concluded a new renewables tender for innovative projects, securing 486 MW of capacity at final prices ranging from EUR0.0500 (\$0.0590)/kWh to EUR0.0639/kWh

The report noted that, based on implied solar and storage costs from these bids and bottom-up global cost estimates, a solar-plus-storage system can deliver 24/7 clean power with over 95% availability for under INR6/kWh. It ...

The Ministry of Energy of Romania has reopened a competitive solicitation for battery storage for the grid integration of renewable energy, seeking "at least" 240MW and 480MWh of resources.

The solar-plus-storage project in Saxony. Image: Leipziger Stadtwerke. A solar-plus-storage project has been commissioned in Saxony, Germany, the first in the state from the recent "innovation tenders" to do so. ...

The objective of the call is to put into operation a minimum of 240 MW of electricity storage in batteries, which equals 480 MWh, by June 30, 2026. The aim is to contribute to Romania's National Recovery and Resilience ...

## **Solar plus storage tender price in Romania 2026**

In that call, 2,660MW of renewable projects won funding while 1,000MW of energy storage projects were successful, spread across 65 projects winning a total of 427.5 ...

This tender stands out for beating the recent price discoveries from plain vanilla RE hybrid tenders. This tariff discovery is the lowest ever for a solar plus storage tender, ...

June 15 (SeeNews) - A 4-MW solar project of French renewable power plants operator Voltalia SA (EPA:VLTS) is among the winners in a solar-plus-storage tender for France"s overseas ...
