

# Solar storage container EPC turnkey quotation per 20kW 2030

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.

What happens if the EPC contract is uncertain?

Any uncertainty in the EPC Contract may unfortunately see the Contractor liaising directly with these third parties and possibly risking the relationship of the Project Company with key influencers, customers and long-term neighbours.

What is an EPC contract?

An EPC Contract delivers these requirements in a single integrated package, which is one of the major reasons why EPC Contracts are the most common form of construction contract used in project-financed utility-scale solar projects. The key clauses in any construction contract are those that impact on time, cost and quality.

What is an EPC project?

EPC projects that are also known as 'turnkey' and as the contractor assumes responsibility for engineering services, procurement of materials, hiring of teams and materials, and execution of the work, among other tasks, to deliver the project ready to be operated by the client by a given deadline and with a number of guarantees.

What are the disadvantages of an EPC contract?

Another major disadvantage of an EPC Contract becomes evident when problems occur during construction. In return for a guaranteed price and a guaranteed completion date, the Project Company cedes most of the day-to-day control over the construction.

It's generation . . . it's transmission . . . it's energy storage! The renewable energy industry continues to view energy storage as the superhero that will save it from its greatest problem--intermittent energy production and ...

Turnkey systems, excluding EPC and grid connection costs, saw their biggest reduction since BNEF's survey began in 2017. Image: BNEF. BNEF analyst Isshu Kikuma discusses trends and market dynamics impacting the ...
