Why are energy infrastructure projects not working in Ethiopia?

Internal national security concerns continue to affect energy infrastructure projects. Conflicts in Sudan, South Sudan, Yemen, and Somalia are delaying Ethiopia's ability to strengthen energy cooperation with neighbouring countries and export electricity.

How important is electricity access to Economic development in Ethiopia?

Expanding electricity access is fundamental to economic development. While the current distribution grid covers only 25% of Ethiopia's land area, 68% of the population resides less than 5 km from the grid. This highlights the potential to triple the number of household connections within the footprint of the existing grid.

How much electricity does Ethiopia produce in 2040?

The share of solar in electricity generation reaches 17% in 2040. Ethiopia's net electricity exports until 2036 will primarily be driven by large-scale hydropower investments. However, net import of electricity is expected from 2038, as the pace of demand growth in Ethiopia exceeds that of supply, in the least-cost development. See Figure 6.4.

How much does electricity cost in Ethiopia?

Such a mechanism is in line with the tariff guidelines and can be linked to or combined with the four-year tariff adjustment plan. Hydropower costs range from 3-5 cents per kWh, and wind and solar costs are between 5-7 cents per kWh. These cost structures align with Ethiopia's export tariffs to Kenya, which are priced at USD 6.5 cents per kWh.
