

Successful bid price of wind solar storage project in Spain 2026

How much does a 20 MW wind project cost?

License: Creative Commons, Attribution-NoDerivs 2.0 Generic. Elawan won with a 20-MW wind project, submitting a price of EUR 39.88 (USD 41.34) per MWh. Forestalia, participating as Nearco Renovables, was successful with three wind projects -- two of 10 MW and one of 5.5 MW, pricing them at EUR 45.01, EUR 45.06 and EUR 45.12 per MWh.

What are the best solar projects in Spain?

Planta Solar de Balboa (500 MW): Also located in Extremadura, this project contributes significantly to Spain's solar capacity and showcases the region's potential for utility-scale projects. **Andasol Solar Complex:** A pioneering concentrated solar power (CSP) project that includes thermal storage, allowing for energy delivery even after sunset.

How much does wind energy cost in Europe?

Wind power prices, on the other hand, are more stable and range between EUR60 and EUR80/MWh. This indicates that wind energy in Europe tends to be less location-dependent than solar energy. However, the key question is: How do these prices compare with the capture prices?

How many megawatts did a company bid for a wind project?

A total of 84 companies made bids, reaching 9,700 MW, which is three times the power offered. The megawatts allocated were distributed amongst 32 business groups. Capital Energy is won the most megawatts with a total of 620 MW of wind projects (20% of the total offer).

What are some examples of large-scale wind projects in Spain?

Reinosa Wind Project: A 300 MW onshore wind development in Cantabria is an example of new large-scale projects supporting regional growth. **Offshore wind pilot projects:** Although Spain currently has no commercial offshore wind farms, the government has outlined plans for floating wind projects in the Canary Islands and the Mediterranean.

How much does solar PV cost?

By technology, 2,036 MW were awarded in solar photovoltaic (1,000 MW are part of the offer in which there was no technology restriction) and 998 MW in wind. As for the prices achieved, according to Government data, the weighted average price was 24.47 EUR/MWh for solar PV and 25.31 EUR/MWh for wind.

Conclusion The capacity market in Spain represents an opportunity for the storage sector but cannot be considered the sole basis for investment. Its design must be ...

These estimates show the average forecast prices for pay-as-produced PPAs in the period 2026-2035, which

Successful bid price of wind solar storage project in Spain 2026

are necessary to cover the costs of new construction, operation and financing of new plants.

New Economic Regime is composed by the following main characteristics: In the auctions, bids shall be made for the price of the electrical energy, expressed in EUR/MWh, and the product to be auctioned shall be ...

Bidders are required to submit tender documents outlining their proposed approach to the project, including logistics, technical design, company structure, examples, and references from previous projects, as well as cost. ...

"In the longer term, good prospects will open up again for new solar parks in Spain, but we are currently focusing our project development primarily on wind energy and ...
