

# Total investment cost of modular ESS container project in Canada

What is a modular ESS?

of ownership and performance. Stem's Modular ESS scales with power and energy from few MWh to GWh. The Modular ESS integrates state-of-the-art Lithium Ion Battery System/DC Blocks and Power Conversion Systems (PCS) from top-tier Original E

Can a container-based building save energy?

Research findings also prove that with the improved container (IC) model that the container-based building, like other structural systems, can benefit from the improved energy performance and related energy cost savings (up to 65% as compared to the base case).

Do improved containers reduce building life cycle costing?

As shown in the study, adopting the improved container (IC) will result in 28% total life cycle cost savings over the improved lightwood (IL). Overall, 10% of total costs reductions in building life cycle costing can be expected while utilizing the improved cases. Fig. 10. Results of life cycle costing of case studies. 5. Conclusion

Why are containers becoming a housing solution in Canada?

Containers provide a compact, low-footprint housing option. They are also eco-friendly, using significantly fewer construction materials than conventional homes. For these reasons, containers are becoming a housing solution of choice across Canada.

Can repurposing containers match conventional buildings?

This clearly indicates that regardless of the desired structural system, the difference in life cycle environmental impacts after 50 years is minimal. Thus, repurposing containers into permanent structures can match conventional buildings in term of life cycle benefits.

What is a modular container structure?

According to Berbesz, and Szefer [25 ], modular container structure was first conceived by Phillip C. Clark in 1989 as an innovation of converting steel containers into habitable space. In Korea, China, Turkey, and all over the world, container relief camps are constructed as modular prototypes for refugees and displaced populations.
