

# Warehouse solar storage tender price in Italy 2025

How much does energy storage cost in Italy?

From ESS News The results of Italy's main grid capacity market auction for 2025, published by Terna, show that energy storage represented 51.1% of the 174 MW of new capacity assigned. Thermoelectric plants made up the balance, with the new capacity secured for EUR67,500 (\$72,900)/MW per year, for a total cost of EUR11.75 million.

How much storage capacity will Italy need by 2030?

Namely, according to the updated scenario developed by gas company Scam and power grid operator Terna, Italy will need 72 GWh of storage capacity by 2030 to meet the EU's "Fit for 55" package goals. Around 50 GWh of this capacity will be allocated to new utility-scale systems supported by MACSE to complement the growing penetration of renewables.

How much does a solar plant cost in Italy?

Developers submitted maximum discounts ranging from 2.01% to 7.91% off the auction ceiling price of EUR0.078175 (\$0.084949)/kWh. The lowest accepted bid was EUR0.07199/kWh for a 2.7 MW solar plant in the province of Ancona, central Italy.

The Italian regulator, Gestore dei Mercati Energetici (GME), announced that the PUN will be abolished starting January 1, 2025, though it will continue to serve as a benchmark for long-term electricity contracts. The PUN ...
