

Wholesale standalone energy storage price list in Greece

How much does energy storage cost in Greece?

For the first energy storage auction, the regulator has set a capped CfD price of EUR115,000 per MW per year. As a result, winning projects must participate in the energy market, such as Greece's wholesale electricity trading and secondary balancing services market. Each year, the government will assess the projects' market earnings.

How many energy storage auctions are there in Greece?

Greece's energy regulator has announced three separate auctions for standalone energy storage systems connected to electricity transmission networks. The application process for the first auction, which involves 400 MW of energy storage, will be open until July 10.

Which energy storage projects will be included in Greece's energy tenders?

The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network. The tenders exclude the island network of Crete, which was linked to Greece's mainland power grid in 2021.

What is Greece's energy storage program?

Greece's energy storage program will draw EUR341 million (\$372.3 million) from the European Union's post-pandemic recovery fund, which was approved last year by the European Commission. The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network.

Will Greece allocate 1 GW of new energy storage capacity?

RAAEY - Greece's newly formed regulatory authority for waste, energy, and water - has revealed that the country will allocate 1 GW of new energy storage capacity. The program consists of three separate auctions, with capacities of 400 MW, 300 MW, and 300 MW.

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.
